EXTINGUISHING SYSTEMS FOR SALOON, SPORT AND SINGLE SEATER CARS						
ONE COLLECTION						
N	CE0-FAL4-A01		<p>C CEFAL4: This fire extinguisher system is homologated FIA 8876-2022, the last and innovative FIA standard for plumbed in-fire suppression system for open cockpit cars. The bottle is made in aluminum with an innovative save spacing solution. The system covers a wide range of fuels (from petrol till E85 CLASS I II and V (E85)) and it is suitable for electric and hybrid cars also. The extinguishing medium when released, is non-corrosive and not electrically conductive. In contrast to foam or powder, it does not leave any damaging residues, so the systems do not have to be cleaned and remain up and running after the release of the fluid. The system gets pressurized when activated, enabling the discharge of the extinguishant. The electrical system is waterproof and ready to be installed and the ECU is IP65 and IP67 certified. Fixing brackets, clamps, piping, and connections are included. Bottle weight: 3,2 Kg. Diameter: 110 mm.
